

Downtown Greenway Soundwalk RFQ  
Questions and Answers

**Q: Will the audio content be recorded and provided by Downtown Greenway, or will we have to source a voice over artist to narrate the audio?**

A: As stated in RFP:

"As part of that initial work, Contractor will collaborate and work directly with Atlanta, GA based Artist, Radcliffe Bailey, to identify specific touchpoints and create audio content that will enhance the commissioned artwork."

"GDG will provide access (e.g., via dropbox, google drive, email, etc.) to additional content (images, for example) and Contractor will manage the formatting, editing, creation, and management of all content."

The GDG will provide still images of touchpoints, for example, and access to the artists who created the work. The developer will conduct interviews and create and edit content. If artists are not available to provide audio, developer will need to create that content using other narrators.

**Q: What is meant by insurance in the requirement section?**

A: We require liability insurance as a standard requirement for our rfp's.
